Ethylene-propylene rubber	Latex carbon black masterbatch process 250
Vulcanization 118, 133, 562, 1083	Latex, NR Reinforcement in 848
Soluble catalysts for preparation 1101 Sulfur curable 1114, 1126, 1142	Latex
During Colubio ally lawy area	Study of with electron microscope 1028
Fatigue 46	Low Temp. Properties, 4th issue xvi
See accelerators, vulcanization	Magnesium oxide
Fibers, Book, see Carroll-Porczynski, C. Z.	Retarding effect on heat treatment 477 Makromolekulare Stoffe. Vol. XIV, Part 1
Filled rubber Behavior at high extension rate 813	Makromolekulare Stoffe. Vol. XIV, Part 1
Viscoelastic properties of	"Methoden der Organischen Chemie!"
Viscoelastic properties of 291 Filled EPR 1142	of Houben-Weyl "Methoden der Organischen Chemie," Book, 3rd issue
Fillers, filled stocks	Masterbatch, carbon black
Random dispersion of	Mastication Formation of MBTS from MBT during 671
Adsorption properties of	Crosslinking during 896
Adsorption properties of	MBT Determination 665
amount on section period	Decembration

SUBJECT INDEX

Deaglin with milher	Page		Page
Reaction with rubber	671	Phys. Testing, Russian, 5th issue Poisson distribution of fillers	819
MBTS Reaction with diphenylmethane, S, and		Polybutadiene Unfrared spectra	57
zinc butyrate, see diphenylmethane		Infrared spectra Isomerization with sulfur	536
Activity and radicals from	652	Compounding	546
Determination	665	Compounding	618
Formation during milling	671	riydrogenated	1052
See accelerators Measuring and control techniques, Book, see		Polyisoprene	1066
Lehman, J.		Microstructure see infrared, x-ray diffrac-	
Mechanical properties	388	tion	57
At high extension rates	813	Hydrogenated	1063
Of rubber covered yarns	949	And deutero-cis-polyisoprene dynamic test- ing	937
See fillers Mechanical properties of polymers, L. E.		See also natural rubber	231
Mechanical properties of polymers, L. E. Nielson, Book, 4th issue	XX	Polydiene elastomers	
Mechanism of Vulcanization		Microstructure, see infrared x-ray diffraction	
See vulcanization, kinetics, etc. Mechanochemical		Poly(dimethylbutadiene) Infrared spectra	57
Degradation	896	cis-1,4-Polyisoprene rubbers	57
See fatigue, mastication		Polypiperylene	~.
Mercaptothiazole and derivatives Rubber Review	1260	Infrared spectra	57
See MBT, accelerators	1360	Polystyrene	457
Microscopy		CrosslinkedPolysulfides	437
In study of fillers	228	In vulcanization	2
Of latex	1028	See kinetics of vulcanization	
See fillers, latex	57	Polyurethans	000
Microstructure	21	Viscoelastic properties 284, 291,	753
Diphenylmethane as model for rubber in		Viscoelastic properties	753
study of cure	491	Relation between structure and properties	970
Hydrocarbon dispersions as model for	977	Polyurethan VCPoly(vinyl chloride)	742
Cas isoparaffing	118	Poly(vinyl chloride) filled with glass beads	
See isoparaffins	906	for study of reinforcement	726
Molecular packing and reinforcement, size, form, and flexibility of rubber 906,		for study of reinforcement	716
form, and flexibility of rubber 906,	908	Processing, Book	xxiii
Molecular weight of NR	xvii	Processing, Book Properties of materials at low temperatures (Phase I), Book, 4th issue	
Mullins effect	259	(Phase 1), book, 4th issue	xvi
